# TAKE DOWN<sup>®</sup>

Take Down<sup>®</sup> brand is a line a of OC pepper and tear gas sprays manufactured by Mace Security International, Inc.

Since 1970, Mace<sup>®</sup> has been the original trusted brand in defense sprays. The Take Down<sup>®</sup> line of pepper sprays continues a long-standing commitment to providing quality products for law enforcement, corrections, military and security personnel.

From the maximum strength OC pepper formula of Take Down Extreme<sup>®</sup> to the blended formula that combines the power of tear gas with OC pepper—Take Down<sup>®</sup> offers a wide variety of less-than-lethal sprays.

MANUFACTURED BY

Model	MK -III	MK-IV
Item #	3994	4994
Spray Pattern	stream	stream
Range	Up to 20 ft	Up to 20 ft

WESKO

# EXTREME OC

This unique gel formula outperforms conventional OC sprays. The maximum strength 1.4% Capsaicinoids concentration is suspended in a sticky gel that sprays farther and sticks on contact to minimize cross-contamination. When used indoors, there is less chance of contaminating the surrounding areas or effecting bystanders. When used outdoors, it reduces the chance of blowback in windy conditions. The non-flammable formula will not ignite with stun guns or similar electronic devices.

## EXTREME OC GEL

Model	MK -III	MK-IV	MK-IX
Item #	3010	4010	9010

# TACTICAL HANDLE

Introducing the all new Take Down<sup>®</sup> Tactical Handle from Mace Tactical Solutions. An effective and efficient way to deploy OC aerosol spray through virtually any riot or capture shield on the market today. Implementing OC directly onto tactical and riot shields increases your use of less-lethal force options and gives the user increased flexibility during a disturbance. Make the Take Down<sup>®</sup> Tactical Handle part of your less-lethal arsenal today.

- Mounts on Riot, Capture and Ballistic Shields
- Rugged, lightweight anodized aluminum construction
- Available with a variety of nozzles for the deployment of fog, stream, and gel formulas
- Knurled grip for superior control and retention
- Fully adjustable to fit a wide variety of shield manufacturers' hole spacing and shield thicknesses
- Minimal additional training required
- Quick and simple to install
- Ideal for cell extractions
- Made in the USA

Item# 10000

# TG GUARD

## Protect your staff & your facility from violent disturbances.

The TG Guard Security Protection System is designed to move disruptive inmates out of an effected area without sending in correctional officers who could be harmed or taken hostage.

Contain, control, isolate—these three actions prevent a disturbance from escalating from a minor incident to a riot.

For more information visit [www.tgguard.com](http://www.tgguard.com)

The TG Guard Security Protection System is operated through a secure remote console to selectively deploy a tear gas agent in an area where a disruption is occurring.

The TG Guard System deploys a powerful tear gas deterrent agent from single or multi-fixture dispensers. The fixtures are tamper-resistant and inaccessible to the general population.

The TG Guard System is typically installed in high traffic or common areas where the maintenance of security is most challenging, such as dining halls, gymnasiums, and work areas.
